Eye Appeal Sells HUGONIS

("Golden Shrub Rose of China")

To gain favorable attention with this shrub-like

To gain favorable attention with this shrub-like beauty, and to tempt your trade, plant Hugonis at the entrance to your establishment; let it add attraction to your display pots; or have it give grace to some of the most prominent of your plantings. The results will please you and turn money into your treasury!

With great golden Hollyhock-like blooms of clear yellow in Mid-May, Hugonis heralds the other Roses. The bush is continuously attractive, even when the flowers have flown, for its slender arching branches are charmingly clad with Acacialike foliage, and maroon-colored new growths are constantly beckoning the eye. Hugonis is at home as an early flowering hedge, in a shrubbery planting, or upon the lawn!

Dormant own root plants for immediate or spring delivery
